

Broadband IP Addressing and Justification

Gamma provides a single fixed IP address on all connections. Where the end customer does not want to use NAT and needs to assign public IP addresses to machines on their LAN, Gamma will provide the following routed IP subnets:

IP Block	Subnet Size	Usable IPs	Availability and Process to Order
/32	2	1	Free with each circuit
/30	4	2	Available to order through the Portal during the order placement.
/29	8	6	Available to order - requires IP Justification document completion
/28	16	14	Available to order - requires IP Justification document completion
