

Audio Conference Requests

Gamma provides a white-label wholesale audio conferencing solution for resale to the businesses or organisations that would benefit from the service. This is a dial in any time service that does not require the booking of bridges and lines and that operates on permanently allocated PINs basis.

To reserve a number for use with Audio Conference you should complete the Audio Conference Request Form on the Numbering Navigator. This is available by going to Help and Support and Numbering Navigator and selecting option 3 (I know what form I need) and then select the "Audio Conference Request" form.

We're currently offering the following number options for Audio Conferencing:

- 033
- 0808
- 0843
- 0870

The provisioning team will provision the number for you and confirm the Host and Participant PIN details.
