

# Number Management activities

Number Management comprises a variety of activities each with their own workflow, process and issues.

For the avoidance of doubt, the Gamma Number Management team is responsible for the following activities:

Category	Activity	Description
Number allocations	Specific numbering requests	E.g. 0161 123 xxxx
	High volume requests	E.g. 2000 x consecutive 0161 numbers
Number migrations	Product number migrations	E.g. moving numbers from SIP to Horizon or from one SIP endpoint to another
	Channel Partner number migrations	Moving numbers from one Gamma partner to another or internally between a Channel Partner's own billing accounts
Audio conferencing	Audio conferencing	Number allocation and product set-up

Each category is featured separately within this document to avoid confusion.
