

# Privacy Settings

You can set up on the Gamma Portal if you'd like your SIP service to either:

- Always show your telephone number (No privacy feature)
- Always show your telephone number, and dial 141 before you make a call to withhold your telephone number.
- Always hide your telephone number, and dial 1470 to show your telephone number.

## **Step 1**

From the Gamma Portal, go to "Provisioning and Service Management", "Voice Connectivity", "Gamma SIP Trunks" and "Service Management".

**If you don't have this option contact your Portal Administrator (Help and Support and Portal Administrators) or contact your Internal Account Manager.**

## **Step 2**

Select the account that has the endpoint you wish to update the privacy settings for and click "View".

### Actions

Update Privacy Settings

Apply 141 or 1470 privacy features to this service

This endpoint is eligible for a free upgrade to an Enhanced Build. An Enhanced Build will increase the resilience of the service by connecting the endpoint to two geographically distinct SBCs within the Gamma network, offering automatic failover in the unlikely event of an SBC failure within the Gamma network. To take advantage of this option, the CPE will need to support a dual IP address configuration. To request upgrade select *Request to Migrate to Enhanced Build*.
